Overview

- What, how and why?
- Shimmer **Placeholders**
- Explore the **starter** project
- Create a **basic shimmer effect**
- Add couple of more
- Combine them together
- **Coding Challenge**
- Summary

What, how and why?

Up Next

What, how and why?

- Loading **indicator**
- Faster loading **illusion**
- Visual **guidance**
- Modern look
- Brand identity
- UI Effect which is supposed to be **fun!**

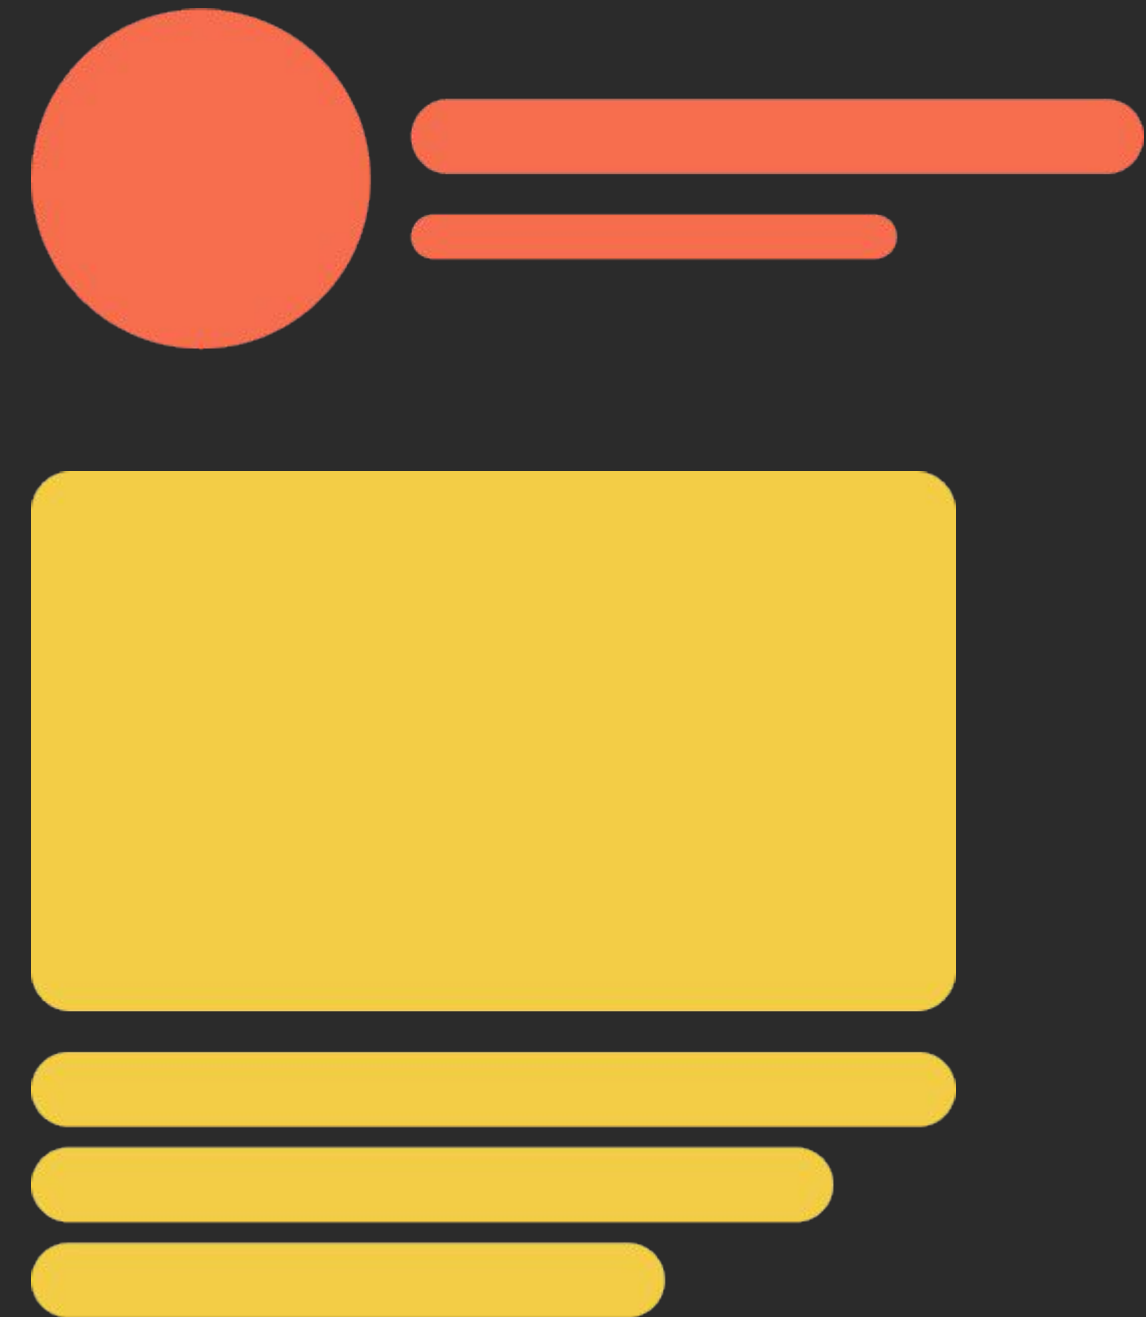

Shimmer Placeholders

Up Next

Shimmer Placeholders

- Placeholders are **dummy** elements.
- They should be properly **arranged**.
- It's **easy** to create them.
- They are **fully customizable**.

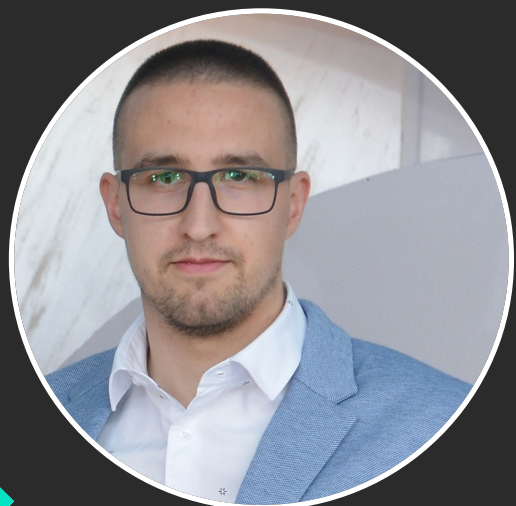

Summary

- What is a **Shimmer Effect**, how does it work.
- The use of **placeholders**.
- Creating a first shimmer effect with an **animated gradient** color.
- Creating a second effect with an **animated offset** property.
- **Combining the first two** effects to get a new one.
- Creating a third effect with an **animated scale** property.
- **Combining all three** different effects to create a new one.
- **Coding challenge**.

Thank you!
